

*Our Career Resource Center organizes a diverse array of workshops and offers a Career Mentorship Program in order to provide young individuals with various opportunities to develop professionally.*

## **For Youth**

Tuesday's Children programs, such as Take Our Children to Work Day and Career Shadow Days, enable our youth to broaden their horizons and gain a better understanding of career options that are available to them. In partnership with a variety of organizations, we provide young individuals with a firsthand look into different industries and functions to cultivate their future careers.

## **For Young Adults & Professionals**

Tuesday's Children, in collaboration with top tier corporate partners, offers virtual and in-person career advancement programming for college students and young professionals. More specifically, we organize valuable workshops pertaining to topics such as resume building, personal branding, interview prep, and career presentations as well as networking opportunities with well-known organizations such as Morgan Stanley, KPMG, NFL and LinkedIn.

## **Career Mentorship Program (for 18+)**

In 2017, we expanded upon the Career Resource Center by launching our Career Mentorship Program. Career Mentors volunteer their time to provide professional guidance to our Career Mentees, the teens and young adults in our community. Our Career Mentors are committed to working with their mentees to answer questions pertaining to career development, review resumes and cover letters, conduct mock interviews, assist with networking, etc.
